Automation Testing

EDUCATION**Bachelor of Technology (B.Tech) 2018**

University: West Bengal University of Technology

DGPA: 8.09

OBJECTIVE

Experienced of **5+ QA engineer** with expertise in software testing, including designing test plans, cases, and automation scripts. Skilled in using tools like Selenium with Java and Python for high software quality. Proficient in Agile and collaborating with teams for superior solutions.

PROFESSIONAL SUMMARY

Software Testing Experience: Over 5+ years in manual testing within the software industry, with strong knowledge of **Selenium WebDriver, QTP, JMeter, Python, and Core Java**.

- **Test Automation:** Designed **Page Object Model (POM)** classes and converted manual test cases into automated scripts using TestNG. Skilled in performing smoke, sanity, and regression tests, utilizing TestNG annotations to create detailed reports, and handling pop-ups with the Robot class.
- **Developed Comprehensive Test Cases:** Created detailed test cases based on client specifications using Core Java and TestNG frameworks.
- **Executed Extensive Test Scenarios:** Utilized **Selenium WebDriver** to execute test cases across a wide range of scenarios, ensuring thorough coverage of web elements.
- **Automated Repetitive Testing Tasks:** Implemented automation for repetitive testing tasks using Selenium and Maven, significantly improving efficiency.
- **Integrated Testing Frameworks:** Developed and integrated automated testing frameworks, leveraging **TestNG and Maven** to streamline the testing process.
- **API and Database Testing:** Knowledge of API testing using Postman and SoapUI, and a solid understanding of **SQL** queries (Oracle 10G) and **MongoDB**.
- **Version Control and Collaboration:** Utilized **GitHub** for version control and collaboration, ensuring seamless code integration and team coordination.
- **Quality Assurance:** Ensured the accuracy and completeness of product releases through close coordination with the **development team**, providing effective testing solutions.
- **Soft Skills:** Quick learner with strong interpersonal skills, a committed team player, and a **hardworking individual** with a passion for mastering new technologies.

PROFESSIONAL EXPERIENCE

OPTUM GLOBAL SOLUTIONS

March 2022 - Present

PROJECT: APPLE FITNESS

Implemented the Apple Fitness Bundle initiative, seamlessly integrating Apple Fitness+ subscriptions and \$25 Apple Store gift cards into the company's myUHC platform. Developed a tailored eligibility verification system using OBAPI, collaborated with vendors for efficient gift card distribution and subscription management, devised a comprehensive communication strategy to drive engagement, and effectively managed financial operations and technical challenges to ensure a successful launch and high adoption rates.

Roles & Responsibilities

- Directed cross-functional collaboration to integrate the Apple Fitness Bundle within the company's myUHC platform, ensuring a seamless user experience for employees.
 - Orchestrated the development and implementation of a custom eligibility check using OBAPI, enabling precise determination of user access to the benefit.
 - Managed vendor relations with InCOMM and Motion team for gift card issuance and subscription management, ensuring accurate tracking and reporting of redemptions.
 - Led communication strategy for member and group engagement, producing marketing materials to inform and motivate participation without requiring ongoing updates.
 - Oversaw financial aspects, coordinating with Apple and internal teams to process monthly invoices and secure budget approvals through Concur.
 - Demonstrated problem-solving skills by addressing technical and operational challenges, ensuring timely rollout and high adoption rates.
-

EXCOTRON PVT LTD.

Nov 2019 - Feb 2022

PROJECT: ATRXIA

Comprehensive web-based business management software that efficiently organizes and manages leads in one central location. Simplifying lead management, contact organization, and follow-ups with customers. It establishes a centralized repository for all customer data, accessible from anywhere, providing a competitive advantage in building customer relationships. Developed with industry standards, proven technologies, and high-quality software engineering practices.

Roles & Responsibilities

- Involved in system study of pain statements.
- Understanding the requirement, preparing Test cases and identifying automat-able TestCases.
- Active involvement in creating the Framework with my team from scratch.
- Prepared Test Data for Framework in Excel File and Involved in writing and reviewing Test Scripts.
- Involved in identifying and implementing re-usable methods in Project specific Libraries.
- Publishing the HTML reports and reporting the same. Performed Batch Execution using TestNG for my modules. Involved in pushing the Test-Scripts to the GitHub.
- Took part in the Daily Stand-up meeting,Sprint Planning meeting.
